

# Community Medical Center ER Clothing Closet

*The Emergency Department Staff at Community Medical Center maintain a clothing closet that is used to provide clean clothes to Patients and visitors whose clothing they had upon arrival is not suitable to leave the ER in. The closet is stocked by donations from staff and other groups in Missoula and provides a valuable resource, especially in the winter months. Some of the largest needs are clean socks and gloves (winter).*

*Pastor Mat works in the ER and sorts out items from the barrel to go to the closet. All other items will be sent to HOPE.*
